1. The first group of bars represents the initial state of the system, where the system is in a state of high energy and low entropy.

2. The second group of bars represents the state of the system after a small perturbation, where the system is in a state of lower energy and higher entropy.

3. The third group of bars represents the state of the system after a larger perturbation, where the system is in a state of even lower energy and higher entropy.

4. The fourth group of bars represents the state of the system after a very large perturbation, where the system is in a state of low energy and high entropy.

5. The fifth group of bars represents the state of the system after a very large perturbation, where the system is in a state of low energy and high entropy.

6. The sixth group of bars represents the state of the system after a very large perturbation, where the system is in a state of low energy and high entropy.

7. The seventh group of bars represents the state of the system after a very large perturbation, where the system is in a state of low energy and high entropy.

8. The eighth group of bars represents the state of the system after a very large perturbation, where the system is in a state of low energy and high entropy.

9. The ninth group of bars represents the state of the system after a very large perturbation, where the system is in a state of low energy and high entropy.

10. The tenth group of bars represents the state of the system after a very large perturbation, where the system is in a state of low energy and high entropy.
